Booth Selection Process

Starting in 2014, we added a new process of allowing vendors to choose the booth they want during the application process. This is a first requested selection process. There are some reserved booths for each category such as commercial, food, prime and general. Based on which category of vendor, a list of available booths in that category will be displayed.

Some booths the electrical option will not be selectable. This is because some booths they automatically come with electricity and there is not an option to not have it. Some booths have an option for electricity, and some booths do not have an option for electricity at all.

The most important thing to remember is your booth will only be reserved for no longer than 24 hours to await payment. If you do not pay the total due shown when the application, your subject to lose your booth spot.
